

The Komprise Data Experience (KDX)

Analyze, classify, secure, move unstructured data at scale.

Komprise is a storage-agnostic data management platform that gives your enterprise the best experience with your unstructured data across storage, backup and AI silos. Komprise works with your unstructured data everywhere – no matter where it is stored, no matter what backup is used, no matter what ransomware defense you have in place and no matter what AI you run on it. Komprise never gets in the way, never locks your data up, and always keeps you in control of your data. We call this the Komprise Data Experience (KDX).

Storage-Agnostic Unstructured Data Management

80%

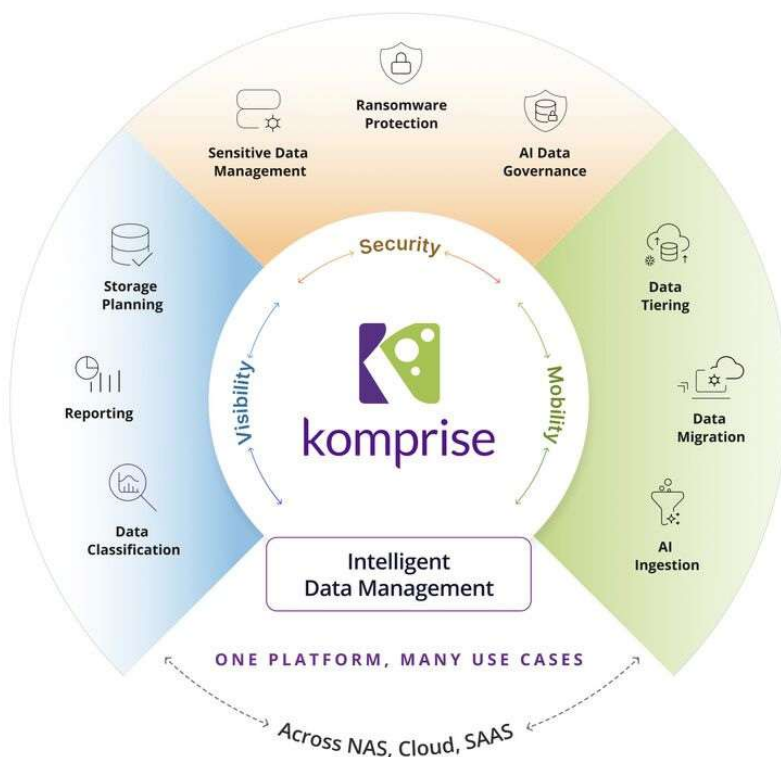

better AI results.

70%

reduction in storage costs.

27x

faster data migration.

Our digital collections are growing in leaps and bounds but budgets stay flat. With Komprise we're able to improve efficiency with a systematic workflow to index data, run AI and tag data.

The Komprise Intelligent Data Management Platform

Why Komprise?

Komprise puts enterprise IT in control of unstructured data chaos. With Komprise Intelligent Data Management you can easily analyze and classify petabytes of unstructured data scattered across NAS, Cloud and SaaS silos, reduce data risks and costs, and send the right data to AI with confidence.

- STOP** Making storage decisions in the dark.
- STOP** Overspending on data migrations.
- STOP** Paying the rehydration penalty.
- STOP** Exposing your weakest link to ransomware.
- STOP** Sharing sensitive data with AI.

Don't see your storage?
Komprise works across NFS, SMB/ CIFS, REST/S3, and more.
